

# Recent Trends in Industrial Machine Vision: Challenging Times

Dr. Axel Clouet
Technology and Market Analyst, Imaging
Yole Group

### YOLE GROUP

We provide industrial companies, financial investors and R&D organizations, with market research and marketing analysis, technology, supply chain and cost analysis, as well as performance evaluation, to help our customers in their decision-making about their future business and manufacturing strategy in the semiconductor, photonic and electronic sectors.

#### **3 CORE ACTIVITIES BASED ON DEEP SYNERGIES**

## Market & Technology

- Market, technology, and strategy consulting
- M&A, Due Diligence and evaluation of companies

# Teardown Reverse engineering and costing

- Technology, process & cost analysis
- Teardown and reverse engineering
- Comparative analysis

## Performance analysis

- Test of electric and electrooptical performance of devices
- Comparison of performances and related technical choice

## Agenda

• Industrial machine vision – the global picture

Technology trends: focusing on software?

• Ecosystem: new competitors

# **Industrial Machine Vision – Global Picture**

## **Machine Vision: Definition and Examples**

"When the machines use images to sense the world"

Focus of this presentation:

Mobile & Consumer

Retail

Facial recognition

Other 3D sensing

DMS

## A Wide Range of Cameras and Systems

## **High-end CMOS image sensors inside**

PC-based cameras

3D laser profilers

Smart cameras

Fixed-mount industrial barcode scanner

#### Camera market evaluation for 2023:

- Market Value
- Volumes

~\$5 billion

~7 million units

#### Low-end CMOS image sensors inside

Fixed barcode scanner for retail

Handheld barcode scanner

## **Camera market evaluation for 2023:**

~\$1.8 billion ~21 million units

## **Use of Cameras by Application and Industry Sector**

**Low-performance cameras** 

**High-performance cameras** 

Major market driver

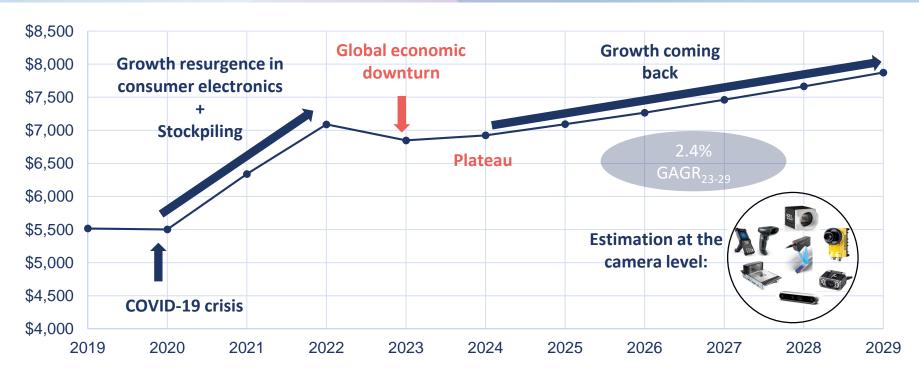

Application / Industry sectors	Identification	Guidance	Gauging	Inspection
Consumer electronics and semiconductor	Low	Low	Moderate	High
Automotive manufacturing	Low	Low	High	Moderate
Logistics, transportation and retail	High	Moderate	Low	Low
Food and beverage	Low	Low	Low	High

Minor market driver

## **Market Forecast**

2023 has been a challenging year for the machine vision industry, after two years of intensive growth.

## **Market Drivers in a Nutshell**

## Long term trends:

Population aging:

Labor and energy cost increase:

**Ecology:** 

Need for automation technologies

=

Need for machine vision

Negative impact Positive impact

#### **Short term trends:**

## **Pandemics:**

**Component shortage:** 

- **Cower production rate**
- Stockpiling
  - Investments in new local supply chains
    © 2024 Yole Group

#### **Global economy:**

• Lower production rate in 2023

#### **Car electrification:**

Investments in battery factories

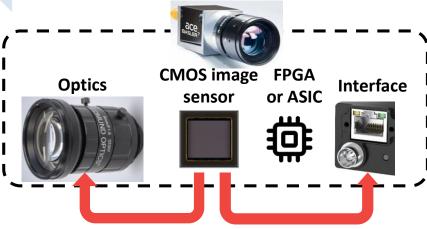

# **Technology Trends: Focusing on Software**

## Hardware: a Stagnation in Innovation?

#### **Average characteristics:**

- Global shutter
- Monochrome
- 1-3 Megapixels
- Backside illuminated
- Interface: GigE

Investment on hardware is on hold due to challenging market conditions.

#### **Low-end cameras**

Towards lower cost, lower power, smaller footprint

#### Average characteristics:

- Global shutter
- Monochrome (NIR or ToF in robotics)
- <= 1.3 Megapixels
- Frontside illuminated
- MIPI

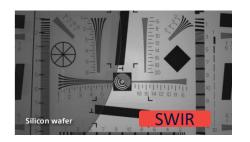

## **Growing Interest in "Exotic" Features**

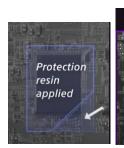

## Extended spectral sensitivity:

Wafer inspection

Monitoring liquids and resins

**UV** light

## 3D (stereo, structured light, ToF):

Bin picking, depalletizing

AMR guidance

## **Towards Simpler Systems**

13

#### **Demand from customers:**

designing their own

vision system

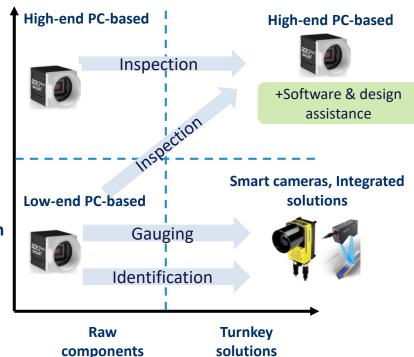

Customers choosing turnkey solutions

Camera manufacturers are focusing on software development

Specialized systems (High-end)

Versatile vision systems (Low-end)

## **Evolution of product offer:**

**Ecosystem: New Competitors** 

# Towards an Aggregation of the Ecosystem?

## Leaders by segment (non-exhaustive!):

#### **Cameras specialists for factory automation:**

Sensing solutions for factory automation:

Robotics

#### **Barcode scanner specialists:**

**CDATALOGIC** 

## Modules for robotics (and 3D):

15

#### Former machine vision ecosystem

## **Future machine vision ecosystem**

Many mergers and acquisitions

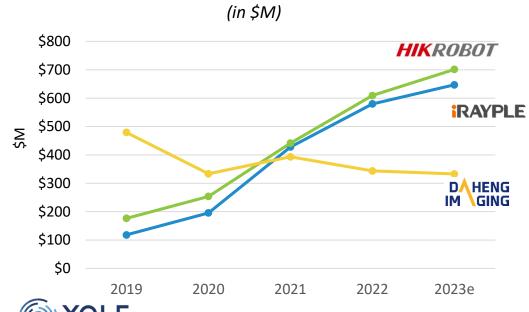

## The Rise of the Chinese Ecosystem

The three Chinese leaders are now among the Top 6 companies in PC-based cameras

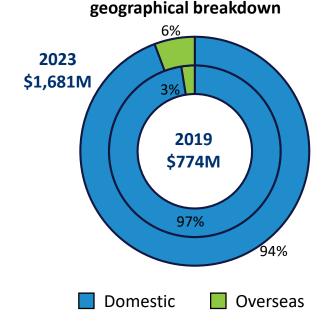

2019-2023: Chinese top player revenues

They are driven by a strong local demand and become more and more present overseas.

Top 3 Chinese players revenues:

## **Newcomers Outside of the Visible Range**

Latest SWIR imagers:

#### SONY

- Quantum dots
- InGaAs
- 6.3 Megapixels
- 5.3 Megapixels

17

- High performance SWIR InGaAs image sensors
- Cooled technologies
- Microbolometers

Machine Vision players

SONY

Challengers

#### **Efficient market access:**

- Existing sales channels
- Complementary sensing offerings (visible range)
- Easy-to-use sensors

# **Conclusion**

## **Key Takeaways**

- The machine vision market has declined in 2023 but is still driven by positive long-term trends.
- Camera suppliers are increasing their efforts on software to satisfy an increasing demand for plug-and-play solutions.
- Chinese leading suppliers are becoming global leaders in their segments.
- There is increasing demand for non-visible technologies, which is an opportunity for defense-oriented players to diversify.
